

Project “Sapronen OÜ Digital Transformation Project” received support from the European Union recovery fund NextGenerationEU

The aim of the project is to increase the level of digitalization in Sapronen OÜ’s production and thereby enhance the company's value added per employee. As a result of the project, a robotic assembly line for pallets and an automatic milling machine for packaging timber will be introduced, contributing to the growth of production capacity.

Grant amount:

146 200 €
